

REMARKS/ARGUMENTS

Applicant has amended the specification and claims from the PCT application. The amended application now has a Cross-Reference to Related Applications immediately after the title. In the amended claims, 12-15 were canceled, and two new claims, 16 and 17 were added. The new claims are to compositions and methods of using the disclosed new compounds. No new matter is added with these uses and compositions. They are supported throughout the specification.

Applicant hopes for the early examination and allowance of the claims.

Respectfully submitted,

Thomas A. Wootton, Attorney
